When you partner with ISSI you're entrusting your data communications projects to a specialist team with the dedication and experience to deliver 100% – on time, on budget, every time.

Infrastructure Cabling

Optical fibre, copper, Cat5e, Cat6 and Cat6a infrastructure for data communications, telecoms, access control, fire, security and all other cabling applications.

Technology Applications

10G solutions, Power over Ethernet (POE), Voice over Internet Protocol (VOIP), Internet Protocol Television (IPTV), Audio-Visual networking and emerging technologies.

Electrical Services

From generator and UPS design to power distribution, power & comms cabinets, workstation upgrades and departmental restructuring. Aesthetic integrity assured with secure dado, plastic and galvanised containment.

Civil Engineering

Ductwork capabilities include open cut and trenchless solutions for Underground rail, railway (UTX) and highway crossings. Internal and external works, whether under, over or around. Non-disturbance works a speciality for TPOs and places of special interest.

Sensitive Sites

Security cleared for Government and MoD sites, and experienced with the unique demands of sensitive and listed buildings.

Project Management

Cost-effective, full-service capability for any size and nature of project with a thoroughly professional, efficient and friendly service guaranteed.

Do you need to have *absolute confidence* in your data communications partner?

www.issidatacabling.co.uk

The Communications Infrastructure Specialists

You can have absolute confidence in ISSI...

When you need a reliable data communications specialist for your next project it's only natural to gravitate towards a company you already know and trust.

But what if you're seeking a new partner, or need services at which your traditional partner doesn't excel? How do you know who you can rely on? With your reputation on the line you need implicit faith in the people you entrust your clients' projects to.

You might not know our name but it's highly likely that you know our work. That's because ISSI has traditionally partnered with the UK's foremost PFI contractors. We've played a leading role in many of the 21st century's most prominent and sensitive communications infrastructure projects.

In fact since 2004 we've completed installations at around 90% of UK MoD sites in addition to major central Government and commercial developments.

Our relationship with the UK's defence telecoms contractor was consolidated in 2009 when we were commissioned to undertake further key projects to take us forward into the new decade. We also completed a £1.6m design project for central Government and our history of successful projects for a leading PFI contractor culminated in a keynote six-month contract in Whitehall.

Our continued success is driven by long-term relationships that are built on trust, integrity and proven performance. Our clients know they can rely on us to complete on time and on budget, and to their rigorous quality standards. We're proud of the part we play. And our clients tell us we have good reason to be.

So yes; even if you don't know us by name you'll almost certainly know us by reputation. We're trusted by people who tend to trust no-one. And that means you can trust us too.

...Because our reputation precedes us.

**"Working with you guys has been a pleasure.
Thanks for making it all go so smoothly.
Look forward to working with you on the next one!"**

Mike - PFI Manager

www.issidatacabling.co.uk

Our clients tell us there are five key reasons why we've consistently been their partner of choice over the years. Are these the same qualities you seek in a trusted data communications partner?

Professionalism

From the moment you outline your requirements to us, our enthusiastic efficiency will show you that you're in safe hands. We support you every step of the way with a range of professional services that includes expert consultation, specification analysis, site surveys, CAD drawings, detailed proposals and client-facing support. Our aim is to be an integral part of your team.

Integrity

You'll benefit from an honest and transparent approach that upholds your vision and integrates with your methodology. When you need to draw on our expertise and experience we'll give it openly and willingly. Our vendor-independence enables bespoke and cost-effective solutions while our strong brand relationships ensure a quality standard that's above reproach.

Reliability

When you work with ISSI you're partnering with a dedicated management team that has more than 50 years' combined operational experience. Whether you need periphery support or team leadership to manage complex responsibilities, our in-house service is underpinned by an ideology of excellence. We're a 24/7 team-player: committed, responsive and resourceful.

Flexibility

Meeting the evolving needs of time-critical projects means keeping a cool head when less seasoned professionals might lose theirs. We have both the accumulated operational knowledge and the capacity to cope. But what really sets us apart is our proactive approach – resolving problems before they occur. We like to make life easy for you; delivering results without compromise or fluster.

Performance

A close-knit team of highly trained and experienced engineers is the backbone of our service. Our installations are compliant with the most rigorous standards and are backed by 100% testing and certification. In addition to manufacturer warranties of up to 25 years, we underwrite our own work for an industry-leading 24 months. What's more, we offer a unique UK-wide emergency response and maintenance service for complete peace of mind.
